PROFESSIONAL SUMMARY

Entry-level IT professional with 6 months of Software Testing internship experience and hands-on exposure to Manual, Functional, Regression, Smoke, Sanity, and Exploratory Testing, including Test Case Design, Bug Reporting, Retesting, and Defect Life Cycle. Familiar with Python, JavaScript, HTML, CSS, SQL/MySQL, OOP, SDLC, STLC, Agile/Scrum, API Testing basics, Jira, Git, GitHub, and MS Excel. Strong in analytical thinking, debugging, problem-solving, documentation, and attention to detail, with a strong willingness to learn and contribute to software and IT projects.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS
Database: SQL, MySQL
Software Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing
Testing & QA: Test Case Design, Test Scenario Design, Bug Reporting, Defect Life Cycle, Retesting, Validation & Verification
Development Concepts: OOP Concepts, SDLC, STLC, Agile Methodology, CI/CD Pipeline
SDLC Models: Scrum, Waterfall Model, Spiral Model
Tools & Version Control: Jira, Git, GitHub, MS Excel
Technical Concepts: API Testing Basics, Debugging, Problem Solving
Professional Skills: Analytical Thinking, Attention to Detail, Documentation, Team Collaboration

PROFESSIONAL EXPERIENCE

QA / Software Testing Intern 6 Months
World Victory Power

- Designed, documented, and executed test cases and test scenarios for functional and regression testing to validate application features against requirements.
- Performed manual testing across smoke, sanity, functional, and regression cycles to ensure software quality and stability.
- Identified, logged, and tracked defects through the complete bug life cycle using Jira, collaborating with developers to verify fixes and perform retesting.
- Built and executed automated test scripts using Playwright, improving test coverage and reducing repetitive manual effort.
- Applied AI-assisted automation techniques to accelerate test case creation and improve overall testing efficiency.
- Executed SQL queries to validate data integrity and perform back-end database testing.
- Participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives to support timely, quality-driven releases.

PROJECTS

Typesider – Practical QA Testing Assignment

- Tested the Typesider application from both QA and real-user perspectives, covering onboarding and the overall user journey.
- Performed exploratory and functional testing across streaks & streak calendar, reward days & eligibility, gift card rewards, reward cards & partner brands, and reward claim/redemption flow.
- Tested functional scenarios and edge cases, identified potential issues, reproduced issues, and documented findings in a structured manner.

Skills: Manual Testing, Functional Testing, Exploratory Testing, Test Case Design, Edge Case Testing, Bug Reporting, UX Testing, Expected vs. Actual Result Analysis

Library Management System — Manual Testing Project

- Developed a Library Management System using Python and MySQL and performed end-to-end manual testing of core modules.
- Prepared and executed test cases for add book, issue book, return book, and search book functionality.
- Validated functionalities, identified defects, and documented bug reports to ensure reliable application behavior.

Tools & Skills: Python, MySQL, Jira, Manual Testing, Test Case Design, Functional Testing, Bug Reporting

EDUCATION

Bachelor of Arts (B.A.) — DDU University 2026
Diploma in Computer Science and Engineering — Board of Technical Education 2025
Intermediate — UP Board 2022
High School — UP Board 2020
